

Professors teach all lecture courses, including the following lecture classes that have enrollments from 60 to 400 students. The majority of lecture courses also include discussion sections of 10 to 30 students. Please understand that professors are not department counselors. If you have any questions concerning a particular field of study, contact that specific department or visit the **Undergraduate Admissions Office** at **1147 Murphy Hall**.

Lectures represent only one type of course format at UCLA. In fact, many of our courses, such as seminars, foreign language classes, and writing courses, have enrollments of 25 or fewer students. Consult the **General Catalog** at **www.registrar.ucla.edu/catalog/** to find out if the class you attend fulfills major or general education requirements. The classes on this form fulfill different academic requirements.

The professors participating in the Spring Lecture Experience have generously agreed to allow visitors to sit in on their lectures provided you follow a few simple rules.

- ❖ Please be on time. If you think you will be leaving before the class ends, please try to sit towards the back so you will not disturb any one.
- ❖ Please only sit in extra seats; make sure that you are not taking the seats of any students enrolled in the lecture.

We hope you enjoy your visit and your UCLA Lecture Experience!
